

# Introducing artificial intelligence with Qapter Intelligent Mobile Estimating

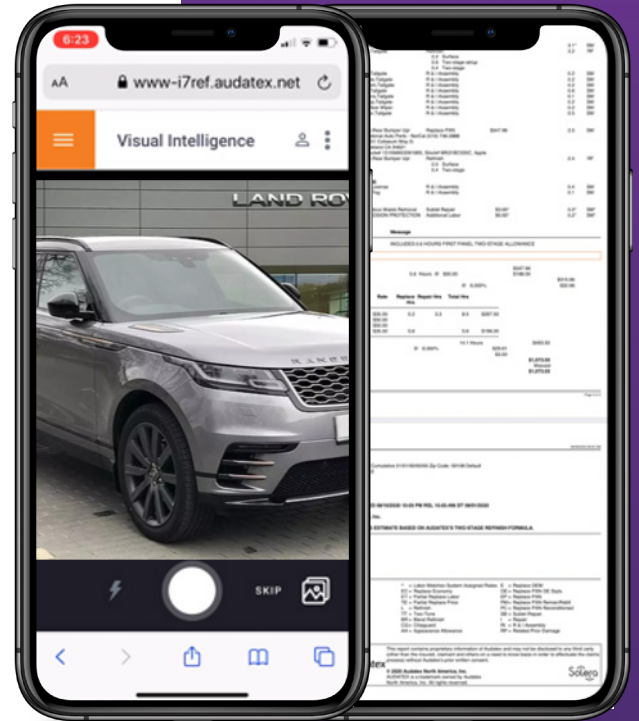

Automatically generate appraisal pre-estimates using photos and Solera's state-of-the-art visual intelligence technology from a mobile device

## Key capabilities

- Create claims directly from the application
- Synchronize all the work in real time with Qapter Claims
- Perform Intelligent Mobile Estimating:
  - Detect damage in external parts of vehicles by processing images through AI and adding contours around the affected areas
  - Determines the size, type & location of damage
  - Get an overall estimation and confidence level based on the data provided

## Benefits

- Estimate calculation in 30 seconds remotely
- Real time image quality feedback to save time
- Empowers unskilled personnel with AI

**300M+**  
global historical claims

**1.5M+**  
imaged added every week

**7.9M+**  
part numbers

**200+**  
manufacturers & brands

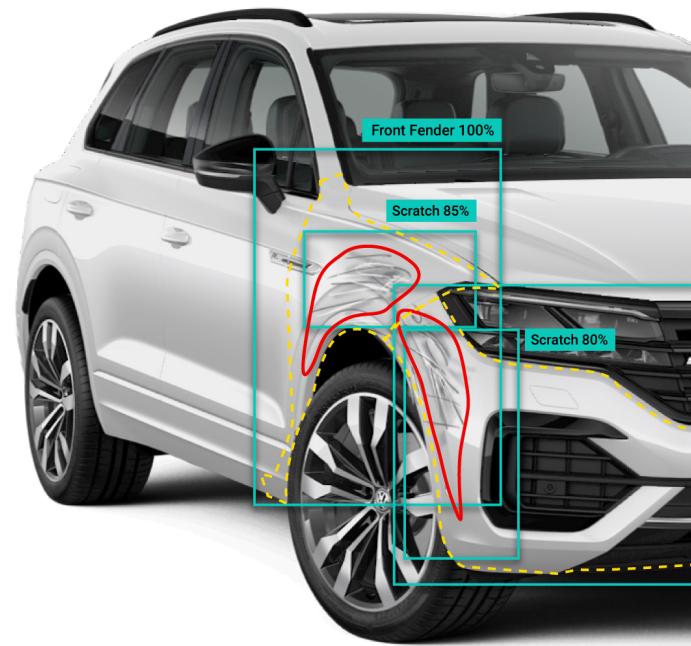

**10**  
global insurers in active collaboration

## 3 minutes to create an appraisal

- Faster vehicle identification through optical character recognition
- Faster photo capturing & real time editing
- Instant pre-estimate generation on-site

## Appraisal expenses reduced by

- Generating pre-filled appraisals for a digital remote adjustment
- Physical appraisals focused on more severe cases
- Enables any user for light damage inspections

line-by-line  
estimate**

Solera's Intelligent Mobile Estimating functionality empowers Qapter to be the next generation claim management solution for Insurers, Dealerships and Collision Repair shops, where un-skilled surveyors, mobile assessors, road assistance personnel, clerks and receptionists are empowered to do appraisals thanks to artificial intelligence (AI):

- Delivers Artificial Intelligence directly into the claim workflow, reducing manual efforts
- Removes the need for an expert to deal with noncomplex cases
- Available for all smartphones with iOS and Android

Solera's Visual Intelligence utilises data science with Repair Science™ technology and knowledge spanning 50 years, incorporating a rich data lake of over 300 million claims worldwide.
